Re: Reply to your Request for Information on Hazardous  
Substances Disposal at the Kodak Processing  
Laboratory, Fair Lawn, NJ

Dear Ms. Rohn:

This response to your letter dated December 29, 1983 is based on our knowledge of activities at our Processing Laboratory at Fair Lawn, New Jersey. The chemicals in the plant effluent were examined according to the definition of hazardous substances outlined in Section 101 (14) of CERCLA, 42 U.S.C. Section 9601 (14).

Question nos. 1, 2, 4 and 5 are not applicable since this is not a manufacturing facility.

- QUESTION 3. No hazardous substances have been containerized and disposed of by this laboratory.
- QUESTION 6. No spills, discharges or leaks of hazardous substances have occurred at this site.
- QUESTIONS 7&8. A map labeled "questions 7 and 8" is attached.
- QUESTION 9. The following chemicals are presently being discharged into the sanitary sewer system:

<u>SUBSTANCE</u>	<u>AVERAGE CONCENTRATION</u>
Acetic Acid	0.4 mL/L
Ammonium Thiosulfate	3.7 mg/L
EDTA	5 mg/L
Ethylene Diamine	.003 mg/L
Formalin (37.5%)	1.3 mg/L
Phosphoric Acid	0.1 mg/L

298091

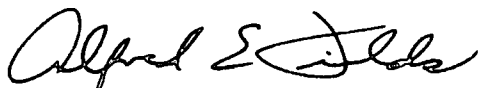

Ms. Robin Rohn --2  
Feb. 8, 1984

Potassium Hydroxide	176 mg/L
Propionic Acid	0.04 mg/L
Sodium Bisulfite	43 mg/L
Sodium Hydroxide	134 mg/L

QUESTION 10. No hazardous substances have been discharged into the Passaic River or its tributaries in Hawthorne, New Jersey or into the Henderson Brook in Fair Lawn, New Jersey.

If additional information is required, please contact me.

Sincerely yours,

Alfred E. Fields
